

Iridescent Insects

By [Alison Dunne](#).

In this resource, spanning six one-hour sessions, teacher Alison Dunne talks through a drawing and embossing project, inspired by insects and the Mexican tin folk art known as 'Hojalata.' Pupils explore observational drawing, colour mixing, texture and embossing with a focus on early scientific artists and explorers such as Maria Sibylla Merian, and contemporary artists such as Rosalind Monks. This project took place with a Key Stage 2 class, but it could easily be adapted to other ages.

The Blood Bag Project

What We Like About This Resource...

This project combines art and science in innovative and creative ways. It engages children with simple and more complex sewing skills, both hand and machine. The fact that a local artist collaborated on this project, bringing her own set of skills and experience is so valuable for any extended art project, and the children were able to connect with the sensitivity of the subject matter and to empathise with it's message.

Remembrance Day Peg Soldiers

What We Like About This Resource...

"It's great to see a different approach to thinking about remembrance day. These peg soldiers are a refreshing alternative to artwork inspired by poppies. The processes involved encourage children to focus on fine motor skills: wrapping embroidery thread around the peg and creating small detailed clothes and helmets. These dolls look particularly effective when standing as a collection and would make a poignant alternative to a standard display board" – Rachel, AccessArt

Turkish Map Fold

What We Like About This Resource...

“This activity is a great example of how we can use paper as the focus of creativity. Often we use paper purely for drawing or painting on, but here, it is central to the activity itself. While these particular folded sculptures have their roots in Turkish culture, you could still deliver the activity if looking at things like Origami too, thus linking it across different cultures” – *Rachel, AccessArt*
