Printing processes that use everyday materials to develop a creative focus for anyone, anywhere By Ruth Purdy

Here are some starting points from which your really accessible printing projects can begin; from printing from plasticine to using everyday objects to make prints. Enjoy!

Monoprints

Using monoprints to free up the drawing process. Simple process using acetate, printing ink, rollers. Pupils draw on top of the acetate and the pressure transfers the “print” onto the paper below. Pupils can experiment with layering drawings and varying the pressure of their mark-making. Monoprinting is an intuitive, freeing process which generates lots of experimental work. Suitable for all year groups.

Aluminium Foil Printing by Paul Carney

Artist Paul Carney shows us Aluminium printing. Aluminium printing provides a low cost and more manageable alternative to the process of etching and engraving used in industry and throughout history.

Making Collagraphs

__Using cardboard, string, found objects and pva glue to create a “plate” ready for printing. If no printing press is available, you can use the pressure of your hand, or a clean roller. Children can explore one or multi-colour printing. The collagraphic plates are also beautiful objects in their own right. Suitable for all year groups.

Lino Print

[_Easy \(Speedy\) carve lino](#) now means it is easier for children to carve and print with lino. Pupils can print in a single colour, or experiment with more colours. The area carved away does not print, so linoprinting gives pupils the opportunity to explore negative and

positive/reverse designs. Due to the sharp tools needed to carve lino prints this activity is more suitable for children in Years 5 (age 10) and above. Ensure you use safety cutting boards to encourage pupils to cut away from themselves.
