

Prop Making for Toys

In this activity aimed at EYFS and SEND, pupils will be given the opportunity to create props for their toys. Pupils will be able to imagine and create a life and environment for their toy, inspired by the original 1970s series of Paddington Bear. This activity promotes the development of skills such as dexterity, hand-eye coordination, creating narratives and nurtures pupils curiosity about the world around them.

Making Musical Instruments

What We Like About This Resource...

“It’s great to see music being explored in this way, and combining it with making creates a really interesting immersive project. This activity would work well as part of an extended project looking at musical instruments around the world and some of the natural materials they are made from.” – *Rachel, AccessArt*

Cupid and Psyche: How a Fifteenth-Century Renaissance

Panel Became the Most Loved Painting in Cambridgeshire

Sheila Ceccarelli tells the story of how Cupid and Psyche, painted by Jacopo Del Sellaio, an Italian Renaissance artist, came to become the most loved painting in Cambridgeshire. Inspire is an exhibition of art made by primary school children and celebrates the creativity of our local schools. It champions the on-going importance of cultural learning and the visual arts for children and young people. A chance also to see Del Sellaio's Cupid and Psyche on display next to the children's work.

To Colour...

As part of Sensory Spaces: An Autism Friendly Project, artist, Sarah Evelyn Marsh ran two sessions exploring the theme of colour. What does colour smell like? What does colour feel like?

Sensory Spaces: An Autism-Friendly Project

To Connect

At the beginning of the project it was important to take time getting used to each other, the learning space and the surrounding environment. Below is a list of considerations you may find helpful to use in your own learning spaces. Be aware of the daily sounds, smells and other textures of life in your learning space; a constant humming noise or flickering light may be stressful for a child with autism. Allow time for everyone to feel their way in the space; connections may be made through the use of different senses and body parts.

To Conceal

During the six week project, the group explored different themes and actions, some of these were displayed through learning schemas. In week 2 we experimented with different ways to conceal ourselves and objects; schemas such as enveloping and enclosure were exhibited by the group.

To Colour

Two of the sessions explored the theme of colour. The first was rather abstract, I asked questions such as; What does colour smell like? What does colour feel like?

For a child on the autistic spectrum, a question like this may be confusing, some autistic people think and understand literally. So instead of directing these questions at the children, I answered and speculated on them myself. These abstract questions became vehicles for the workshops documented below.

To Construct

In my final post on the project, I want to reflect on the theme of To Construct... looking at the different ways we constructed during the project. Please remember this is a personal and artistic reflection, based on the ideas I presented and the (emotional and physical) reactions and responses of the children and their families, who inspired changes and the development of the project as we experienced it.
