

Collage and Assemblage

Welcome to AccessArt: Collage & Assemblage

Collage is a 2D art form and can be created from any type of paper, whether it's found, painted, tissue, magazine, or newspaper. Assemblage, on the other hand, brings creativity into three dimensions by combining and transforming objects to build sculptures.

Collage and assemblage are exciting art forms that let learners experiment with different materials and make creative choices about [composition](#). By arranging found papers or objects, learners can re-see familiar things in new ways.

Have fun exploring AccessArt resources focused on collage and assemblage.
