

Craft

Welcome to AccessArt: Craft

Craft is about skilful making, where working with materials and enjoying the process are just as important as the final outcome. Many crafts are rooted in tradition and are connected to cultural stories and histories. You can see craft in areas such as [ceramics](#), woodworking, [textiles](#), and many other creative practices.

Today, craft is also explored in contemporary ways, mixing traditional techniques with new ideas and creative approaches.

Explore AccessArt resources, which promote an exploration and understanding of traditional and contemporary crafts.

Dip Your Toes Into Craft
