

Flat Yet Sculptural? Drawing, Collage, Construction

By Paula Briggs

Following on from a [previous session in which children aged 7, 8 and 9 used the grid method to scale up simple drawings](#), in this session the children developed their drawings through collage and construction to transform them into sculptures.

"Flat yet sculptural" standing dog!

To Begin

Follow the [method described here to scale up simple silhouette drawings](#). We used sheets of corrugated cardboard. Children used a marker pen to create a single black line around their drawings.

Scaled-up drawing, on cardboard.

Prior to the session I used a photocopier to enlarge engravings by George Cruikshank (illustrations for *Oliver Twist*, Charles Dickens). I have always been attracted to the power and diversity of mark making in engravings, and enlarging the imagery helped isolate and abstract the marks.
