

Houses, Home and Architecture

[<< Go Back To Our Visual Arts Planning Collection](#)

The theme of Houses, Home and Architecture offers rich and engaging opportunities for learners to explore creativity through making, drawing, designing, and collaboration. It encourages hands-on experiences such as constructing model homes, sketching architectural ideas, experimenting with different materials, and working together to solve design challenges.

Beyond developing practical and technical skills, this theme also invites meaningful reflection. Exploring the concept of “home” allows learners to think about their own locality, community, and environment.

Tell us what you are planning to cover or explore this term in your school or institution and we'll recommend resources or learning approaches which we think might feed your teaching.
