

# Insect Cubes

By [Jan Miller](#)

*Jan Miller is an Art and Design teacher with more than 25 years' experience working in formal education settings, currently teaching ages 4-15. In this resource, facilitated with Year 8, learners were challenged to create observational and expressive drawings of insects set inside resin cubes, focusing on scale and materials.*

*The activity consisted of two one-hour sessions in which learners first worked on a small scale to explore the potential of different materials before moving on to larger drawings using a spontaneous, bold, and expressive approach. The distortion of the insects within the cubes, combined with the unusual angles and shifts in scale, made them ideal subjects for expressive drawing.*

*This activity celebrates messy, experimental, and individual responses, guiding learners through an exploratory journey with materials towards the creation of a finished piece.*
