Make a Model Stitched House

By Andrea Butler

This resource was developed to to celebrate the character and diversity of the many beautiful stitched houses we received as part of an <u>AccessArt participatory project</u> called the AccessArt Village. It's a simple way to build a collection of architectural models and allows for lots of different configurations and layouts.

The first step is to create a sewn image of your favourite building using any textile method that you like or by combining methods like printing, painting or <u>fabric crayons</u> and then adding stitch or using <u>free stitching and fabric</u> <u>scraps</u> to create a textured drawing.
