

Make a Model Stitched House

By [Andrea Butler](#)

This resource was developed to to celebrate the character and diversity of the many beautiful stitched houses we received as part of an [AccessArt participatory project](#) called the AccessArt Village. It's a simple way to build a collection of architectural models and allows for lots of different configurations and layouts.

The first step is to create a sewn image of your favourite building using any textile method that you like or by combining methods like [printing](#), painting or [fabric crayons](#) and then adding stitch or using [free stitching and fabric scraps](#) to create a textured drawing.
