

Isabella Scotti

Young Artists

"I am interested in illustration, specifically, I like to draw botanical and animal illustrations such as fish, dogs, and plants and flowers of all sorts. I use Chinese ink, ink pens, pencils and watercolors. I also like to illustrate stories.

Drawing is relaxing to me and it excites me when I can see the end result. I feel excited to share my work with other kids and see what others make. I do not know many kids who draw and I would like to share a community with other artists who have the same hobby as I do. I hope that my work will inspire other kids and give them ideas for their drawings."
